Application

EMF Assembly Services deliver tangible results. The service is available for low to high volume jobs using manual or tool assisted assembly work. It is especially ideal for the integrator who wants to optimize their resources and focus on core competencies. EMF offers quality assembly work by skilled personnel who are ready to meet a variety of challenges. Strict adherence to deadlines and process control improvements characterize the philosophy of our assembly department. EMF assembly services provide many benefits including converting fixed costs to variable costs, and helping to free your resources for other uses. Most importantly, it is EMF's goal to provide a turn-key relationship and offer a single point of purchase for simple to complex assemblies.
