Application

Contract with **EMF Metal Finishing Services** and begin to diminish your need for capital expenditure and overhead costs. EMF finishing services encompass many broad types of finishes. Painting is by far our most popular service. EMF has both high volume powder and wet lines with custom color capability. Studs, cut outs, and grounding points can be masked per specification. EMF can zinc plate or anodize your parts as well. EMF has custom stainless and aluminum finish graining capability. EMF also has engraving capability. EMF can engrave your parts and fill them with enamel.
